MAN & MACHINE presents

Petite Mouse

Petite Size: Elite Performance

If you prefer the functionality and convenience of a compact mouse with a scroll-wheel but need to be able to clean and disinfect it, then you'll love the Petite Mouse from Man & Machine. Just like a typical mouse, the Petite Mouse allows you to right click, left click, scroll up, scroll down and scroll lock. But this workhorse goes much further by protecting against water, dirt and even blood. Pair with a Man & Machine premium keyboard and you have a proper infection control system. The Petite Mouse is naturally antimicrobial, dishwasher safe and may be cleaned with your favorite disinfectant or up to a 10% bleach solution.

Available in black and hygienic white.

A Petite Mouse paired with a Man & Machine Really Cool Keyboard.
